Original Chest X-Ray

AI Heatmap Analysis

Doctor Clinical Description

The uploaded chest X-ray was analyzed using MediScan AI. The AI model evaluated lung fields, heart silhouette and thoracic structures. No significant radiological evidence of pneumonia was detected. This report supports clinical decision making and should be verified by a qualified physician.

Disease Information

Pneumonia is an infection that inflames the air sacs of the lungs. It may be caused by bacteria, viruses or fungi. Common symptoms include persistent cough, fever, chest pain, fatigue and difficulty breathing. Chest X-ray imaging helps doctors detect abnormal lung opacities for early diagnosis.

AI Recommendation

No immediate radiographic signs of pneumonia were identified. Continue routine monitoring and consult a physician if symptoms such as cough, fever or breathing difficulty persist.
